Big Data Analytics Project Template [3-5 páginas]

Project Title
Provide a concise and descriptive title for the project.

1. Introduction & Background
Problem Statement: Clearly define the problem you aim to address using Big Data Analytics.
Research Motivation: What is the key motivation behind choosing this topic?

2. Data Collection & Preprocessing
Data Sources: Where did you obtain your data? (e.g., public datasets, APIs, databases, simulated data)
Data Characteristics: Describe the type of data (structured, semi-structured, unstructured).
Data Cleaning & Preprocessing Steps

3. Methodology & Tools
Machine Learning Techniques

Querying & Storage

Visualization

Streaming (if applicable)

4. Conclusion
Summarize the key points of the report and emphasize the potential contributions of the project in the domain of Big Data Analytics.
